MAINTENANCE: Spillage should be taken up promptly and surface stains removed by an appropriate method as soon as possible. In heavy traffic areas the carpet should be cleaned daily with a vacuum cleaner. Periodic maintenance should be carried out by professional cleaning staff using appropriate extraction systems.
COLOUR MARCHING: As with all textile products there will be a variance in shade from batch to batch. Any samples supplied are as close a representation to the actual carpet as the production process will allow. An exact colour match between different dye batches cannot be guaranteed.
